

# Noise Impact and Mitigation

- A noise impact and mitigation analysis will be conducted according to current City of Colorado Springs policy
- Any existing noise mitigation barriers that need to be removed to accommodate the proposed improvements will be replaced
- Noise mitigation will be considered for any residential area where noise levels are predicted to equal or exceed the City's 65 dBA standard
- The cost/benefit of proposed mitigation measures will be determined using CDOT procedures
- Mitigation measures achieving a sufficient cost/benefit ratio will be included in the project
